2025

WORK EXPERIENCE

Web developer intern

Interactive Cares | 2021 May -present

- Troubleshoot and debugged code ensuring compatibility with devices, browsers, and operating systems.
- Developed user interfaces with modern JavaScript frameworks, HTML5 and CSS3.
- Researched and developed new technology designs.

PROJECTS

E-Commerce Website |

- Created a full-stack e-commerce website that is able to handle and integrate secure payments, routes, noSQL database and OAuth. The Goal was to build a fully working e-commerce website that has features of a scalable and big e-commerce company website for my brother's business website.
- **Technology:** React, Redux, NodeJS, Stripe, Firebase / Firestore

Face Detection Website |

- Worked full-stack on a project to allow users to upload an image URL and detect all the faces inside of it. The goal was to get an introduction into working with web development and full-stack technologies.
- **Technology:** React, Heroku, NodeJS, PostgreSQL, Clarifai (REST API)

Bug Tracker |

- Built a bug/issue tracking web app to track bugs, assign people to work on those bugs, have other informations also. Using mongoDb to store projects and their bugs for different users.

Technology: React, Heroku, NodeJS, mongoDB
